*Full Stack Developer | PHP (OOPs, WordPress) | MERN Stack | AWS & Cloud Platforms | REST APIs | Docker | Git/GitHub | Scalable Web Solutions | ADA WCAG 2.2 AA Expertise*

## 📊 Core Competencies

*Full Stack Web Development (PHP, MERN Stack, WordPress)*

*Custom WordPress Plugin, Rest-APIs & Theme Development*

*Version Control Systems*

*Web Security Best Practices & Compliance*

*CI/ CD Pipeline, Docker, WSL, GitHub Actions*

*Agile Methodologies*

*Performance Optimization*

*Logical Problem Solving & Scalable Architecture Design*

*Team Leadership, Mentorship & Cross-functional Collaboration*

## ⚙ Technical Skills

- **Frontend:** React.js, Bootstrap, jQuery, HTML
- **Backend:** Node.js (Express.js), PHP (Core, WordPress CMS – Headless & Gutenberg)
- **Performance & Security:** Lazy Loading, Code Splitting, Redis, Memcached, Varnish, HTTPS, XSS/CSRF Protection
- **Version Control:** Git, Github, SVN
- **Cloud & DB:** AWS, Heroku, Render, Netlify, Wp-Engine, MySQL, MongoDB
- **Soft Skills:** Team Leadership & Mentorship, Credit Giver

## 👤 Profile Summary

- **Over 11 years of experience** in the IT industry, evolving from front-end development with **HTML/CSS/SCSS** to mastering core **PHP (OOPs), WordPress, and React.js, with proven leadership** in handling client relations, team management, and timely project delivery across platforms including **Shopify and WordPress CMS** solutions.
- **Senior Full Stack Developer**, skilled in end-to-end development, client communication, and technical leadership across a wide range of technologies such as **PHP, MERN Stack, MySQL, MongoDB (Mongoose), Redis, Node.js, and REST APIs**, while ensuring scalable, maintainable solutions.
- Developed deep technical expertise in **PHP, MySQL, React.js, Node.js, Docker, Git, and developer tooling such as WSL and Gulp**, while successfully leading high-impact projects and cross-functional teams under tight deadlines.
- Demonstrated command of software engineering best practices, including design patterns, modular architecture, and complete SDLC phases — from requirements gathering and coding to testing, deployment, and maintenance.
- Proven success in building and **scaling development teams, managing the entire lifecycle of hiring, onboarding, mentoring, and retention, alongside leading project planning,** risk assessment, and timely execution in cloud-based environments like AWS, Heroku, Render, and Netlify.
- Recognized as a key people leader, consistently driving team performance and fostering a collaborative culture in cross-cultural, distributed environments, contributing to organizational growth and team success.

## 📈 Career Timeline

| Oct'13-May'14 | Jun'14-Dec'15 | Jan'16-Dec'21 | Dec'21-Jun'23 | Since Jul'23 |
|---|---|---|---|---|
| Yellow Objects Solutions Pvt. Ltd. | Reserve Step Infotech | Magnious Solutions | OneClick IT Consultancy | AgreeYa Solutions, Noida |

## 💼 Work Experience

**Since Jul'23|** **Sr. WordPress Developer / Sr. Software Engineer – L2**
**AgreeYa Solutions, Noida**
**Key Result Areas:**

- Designed and developed **custom WordPress themes, plugins, and features** based on client and project-specific requirements.
- Maintained both **internal and external enterprise-grade products**, ensuring performance, security, and code quality.
- Conducted **weekly cross-functional meetings** with the **USA-based team** to align on deliverables, progress updates, and integration timelines for external projects.
- **Mentored junior developers**, providing hands-on guidance and regular code reviews to enhance their technical skills and productivity.
- Managed **version control and release cycles**, including branching strategies, pull requests, and production deployments.
- Working with a broad **technical stack**, including:
  - **Languages & Frameworks:** PHP (7.4, 8.2, 8.4), React.js (Gutenberg), Node.js
  - **CMS & Platforms:** WordPress (6.7, 6.8), LAMP Stack
  - **Cloud & DevOps:** AWS (LightSail, EC2, S3, Redis), Docker, Jenkins
  - **Version Control & PM Tools:** Git, GitHub, Jira

**Dec'21-Jun'23| Technical Lead - LAMP Stack | PHP/WordPress Development**
**OneClick IT Consultancy**
- ➔ **Promoted to Technical Lead,** overseeing development across PHP, WordPress, SCSS, Gulp, Node.js, and REST APIs, while mentoring interns and guiding the technical team on daily development challenges.
- ➔ Successfully **published a custom plugin on WordPress.org**, contributing to open-source community exposure and enhancing brand credibility.
- ➔ Conducted **technical training sessions** for junior developers and interns, fostering a learning culture within the team.
- ➔ Led the development of responsive UI components using **HTML5, SCSS**, and build tools like **Gulp** for optimized front-end performance.

**Jan'16-Dec'21| Sr. Web Developer / Team Lead**
**Magnious Solutions**
- ➔ **Led cross-functional teams of 30+ members** at Magnious Solutions in roles such as Project Manager and Team Lead, promoting collaboration, accountability, and consistent delivery of high-quality web solutions.
- ➔ **Oversaw end-to-end web development projects**, ensuring successful execution from planning through deployment while aligning with client expectations, timelines, and budgets—especially for US-based clients.
- ➔ **Demonstrated strong expertise in web development**, working extensively with PHP, MySQLi, MariaDB, WordPress (custom theme and plugin development), HTML, CSS, Bootstrap, and project tracking tools like Jira. Combined technical skill with effective client communication and problem-solving.

**Jun'14-Dec'15| Web Developer**
**Reserve Step Infotech**
- ➔ Joined as a PHP Web Developer and developed various key skills. Guided team and collaborated to stack holders for best feasible solutions.

**Oct'13-May'14| Web Developer Trainee**
**Yellow Objects Solutions Pvt. Ltd.**
- ➔ Started as Trainee Web Developer, gained foundational knowledge in web development, HTML, PHP and CMS components.

## 💼 Projects Undertaken

**Quest Army / DWIHN – 720 days: Confidential Project**

- ○ Maintained and optimized existing codebase, ensuring high performance, security, and scalability in day-to-day operations.
- ○ Developed and implemented new features, updates, and bug fixes for both internal and external projects, ensuring client requirements and project goals were met on time.
- ○ Worked with the LAMP stack (Linux, Apache, MySQL, PHP), focusing on full-stack development for both backend and frontend systems.
- ○ Collaborated with cross-functional teams, including developers, QA, and project managers, to deliver high-quality solutions within set deadlines.

**CEMA| 710 Days**
The project aims to manage events, resources, and 311 service modules for the US public and government sector using a cross-platform Flutter app. It includes maintaining and customizing core functionalities, integrating Google Map Distance Matrix API, and developing REST APIs.

**Tacpass/Tapidy | 486 days**
- ○ Built a social media and e-commerce platform for a top US archery event provider, featuring user login, BuddyPress integration, and multi-level comment threading.
- ○ Integrated real-time data into course details, improving the booking engine for professionals.
